

1/2-inch Preamplifier Type 26CA

Product Data and Specifications

Typical applications

- *CCP inputs*
- *Prepolarized microphones*
- *1/2-inch precision microphones*
- *High levels and high frequencies*

The G.R.A.S. 1/2-inch Preamplifier Type 26CA is a general purpose preamplifier optimized for use with prepolarized condenser microphones. It is a small, robust unit and uses a G.R.A.S. CCP¹ supply, e.g. Type 12AL. It has a very low inherent noise level, a large dynamic range and a frequency response from below 2 Hz to above 200 kHz.

Its small ceramic thick-film substrate has a very high input impedance, and is shielded by a guard ring to minimise the influence of stray capacitance and microphonic interference.

The Type 26CA is delivered with a built-in TEDS² chip, and can be programmed as a single unit with a microphone fitted.
